PROFESSIONAL SUMMARY

Results-driven Front-End Developer with hands-on experience building highly responsive, pixel-perfect web applications using React, JavaScript, and Tailwind CSS. Successfully completed an intensive frontend development internship at CodeAlpha, delivering 3 production-ready web applications with an emphasis on clean UI architectures, intuitive user workflows, and structural accessibility. Passionate about translating complex functional requirements into performant, dynamic code.

TECHNICAL SKILLS

- React.js
- JavaScript (ES6+)
- TypeScript
- Tailwind CSS
- HTML5 / CSS3
- Git & GitHub
- Responsive Web Design
- Dynamic User Interactions
- VS Code
- npm Package Manager

PROFESSIONAL EXPERIENCE

CodeAlpha May 2026 – June 2026

Front-End Development Intern

- Engineered an advanced calculator web application featuring robust dynamic keyboard event listeners, live input validation, and real-time math expression evaluation formulas.
- Developed a fully responsive music player interface with functional audio control mechanisms, including dynamic play/pause toggles, seamless track navigation, and a precisely synced seek progression bar.
- Created a modular, responsive image gallery showcase utilizing asynchronous lightbox view overlays and high-speed dynamic navigation to elevate asset browsing efficiency.
- Leveraged systematic Git version control methodologies, implementing branching, commit hygiene, and repository syncs to maintain clean and reliable source trees.

KEY PROJECTS

Lecture Tracker Application React, Tailwind CSS

- Designed and built a comprehensive timetable and course management platform tailored to assist students and academic faculties in organizing class schedules and tracking room locations efficiently.

E-Commerce Web Architecture React, Tailwind CSS

- Architected a scalable digital retail platform optimized with highly reusable UI components, clean layouts, and adaptive configurations matching both light and dark display parameters seamlessly.

Interactive Task Management Tool HTML5, CSS3, Vanilla JavaScript

- Constructed a modular To-Do application utilizing core functional state transformations to enable fast task allocation, progress milestones tracking, and efficient list deletions.

EDUCATION

Bachelor of Science (B.Sc.) in Microbiology Graduated: 2025

University System — Nigeria
